

RUTLAND TOWN

Septic Suitability 2003

"Soil Ratings for Residential On-site Waste Disposal"

NOTES: The soil suitability classifications for on-site waste disposal shown on this map have been developed by the Natural Resources Conservation Service (NRCS). For more information, refer to: "Ancillary Soil Ratings for Residential On-Site Waste Disposal in Vermont", 2003. This map is intended for planning purposes only and is not intended to replace or supercede an on-site soil investigation. For more information on specific requirements and exemptions refer to the Agency of Natural Resources' report "Wastewater Systems and Potable Water Supply Rules", 2002. NRCS soil scientists map soils down to a three acre minimum, these areas may include a small area that has different soils than the dominant named soils.
