Section 1. Purpose

The Town of Rutland (Town) administers a wide variety of regulatory programs for which the issuance of permits or other administrative action is required of the Town, including without limitation, 911 registration, subdivision of land, access to public highways, construction within flood hazard areas, excavation, or installations within the public highway right of way, sewer allocation and connection, public water connection, and the construction of telecommunication facilities. Experience has shown that, in the absence of zoning, development often occurs without the landowner's realization that various permits or administrative action might be necessary for the activity undertaken. It is disadvantageous to the public health, safety, and welfare, inefficient, and frequently more expensive to address compliance issues after the fact that could have been avoided if the development project had come to the Town's attention before work commenced. The establishment of a permit program for development within the Town that is designed to ensure at the outset that the project receives all the requisite permits and administrative approvals would benefit the person undertaking development, as well as, the public health, safety and welfare. Therefore, the purpose of this Ordinance is to create an informational permit program for development within the Town of Rutland that serves to channel the construction project to the appropriate municipal authorities from whom a permit or other administrative action is required.
